

Industrial Vacuum Salt

Composition

Chemical Analysis	Unit	Specification	Typical
Appearance		Predominantly White Crystalline	
Sodium Chloride (NaCl)	%	99.8	99.9
Moisture (H ₂ O)	%	0.1	0.02
Calcium (Ca)	mg/kg	100	50
Magnesium (Mg)	mg/kg	20	3-10
Sulphate (SO ₄)	mg/kg	900	200-400
E535 (anti-caking agent)	mg/kg	20	8-10

Physical / Chemical / Microbiological Properties

- Free flowing dry powder.
- Typically, 0.10 – 0.71mm grain size.
- Bulk density 1100-1300 kg/m³
- Mix made from raw materials not supporting the growth of microbiological organisms.

Packaging

- 1000kg bags

Storage and Distribution

- Ambient

Shelf-life

- Infinite not required.

Origin

- Packed in UK using raw materials from UK or EU.
